Our Products

Doors

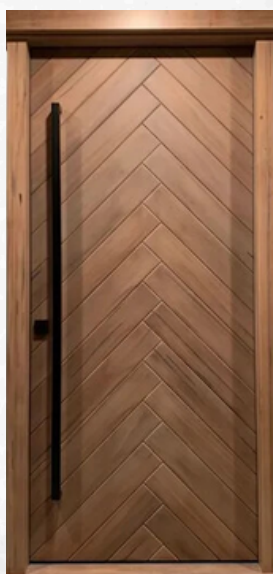

Flush Door

Flush doors: Simple, flat-surfaced interior doors with wooden frame and core.

Laminated door

Laminated doors: Resemble wood, stone; ideal for high-traffic, moisture areas.

Veneer Door

Veneer doors: Thin real wood layer over MDF or plywood core.

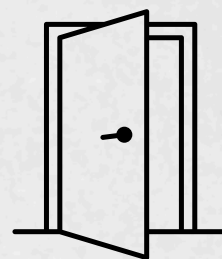

Engineered Doors

Engineered doors: Composite core, faced with laminate, veneer, or solid wood.

Our Products

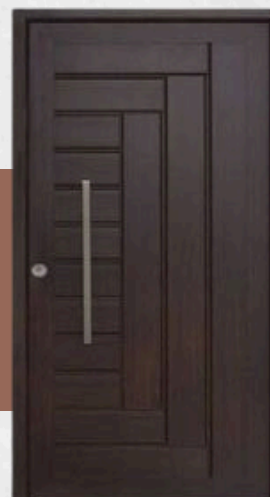

Doors

FRD Door

FRD doors: Steel frame, mineral wool or gypsum core, fire-rated.

PVC Door

PVC doors: Polyvinyl chloride, water and termite-resistant, easy maintenance, ideal for wet areas.

FRP Door

FRP doors: Fiberglass-reinforced plastic, strong, durable, weather-resistant, ideal for exteriors.

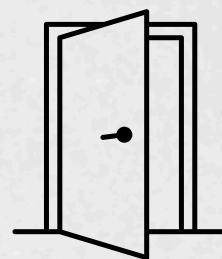

Backlight Door

Backlight doors: Translucent or opaque glass panel, allows natural light.

Our Products

Doors

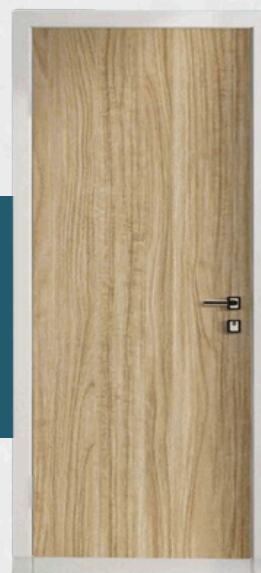

WPC Door

WPC doors: Strong, durable, moisture-resistant, ideal for exteriors.

PVC Door

HDMR doors: Strong, stable, affordable, for interiors.

Our Products

PVC Pipes

- Made from Polyvinyl Chloride, a lightweight and affordable plastic material.
- Known for their good chemical resistance and water tightness.
- Commonly used for plumbing applications like drain lines, cold water lines, and vent pipes.
- Sizes typically range from thin pipes for sinks to wider ones for sewer lines.
- Sunbuild Mart might carry various diameters, lengths, and fittings for your PVC piping needs.

Our Products

Hardware

Hardware, in the context of Sunbuild Mart, refers to a vast category of tools and fasteners used for various construction, repair, and renovation projects. It encompasses a wide array of items that can be broadly grouped into these categories:

- **Fasteners:** These are elements that hold two or more objects together. Some common fasteners you might find at Sunbuild Mart include:
- **Screws:** These have a helical thread that bites into the material when turned, creating a strong connection. They come in various lengths, diameters, head styles (flat, Phillips, Robertson, etc.), and materials (steel, brass, drywall, etc.) for different applications.
- **Nails:** These are pointed metal rods typically hammered into wood or other fastening materials. They come in various sizes and types like common nails, finishing nails, brad nails, and masonry nails.
- **Bolts:** These are cylindrical threaded fasteners that are used with nuts and washers to create a secure connection. They come in different lengths, diameters, thread patterns, and materials depending on the application's strength requirements.
- **Nuts:** These are threaded metal pieces that screw onto bolts to tighten and secure them. They come in various shapes like hex nuts, wing nuts, and carriage nuts.
- **Washers:** These are flat, ring-shaped plates often used with screws, bolts, and nuts to distribute the load placed on the material and prevent them from pulling through.

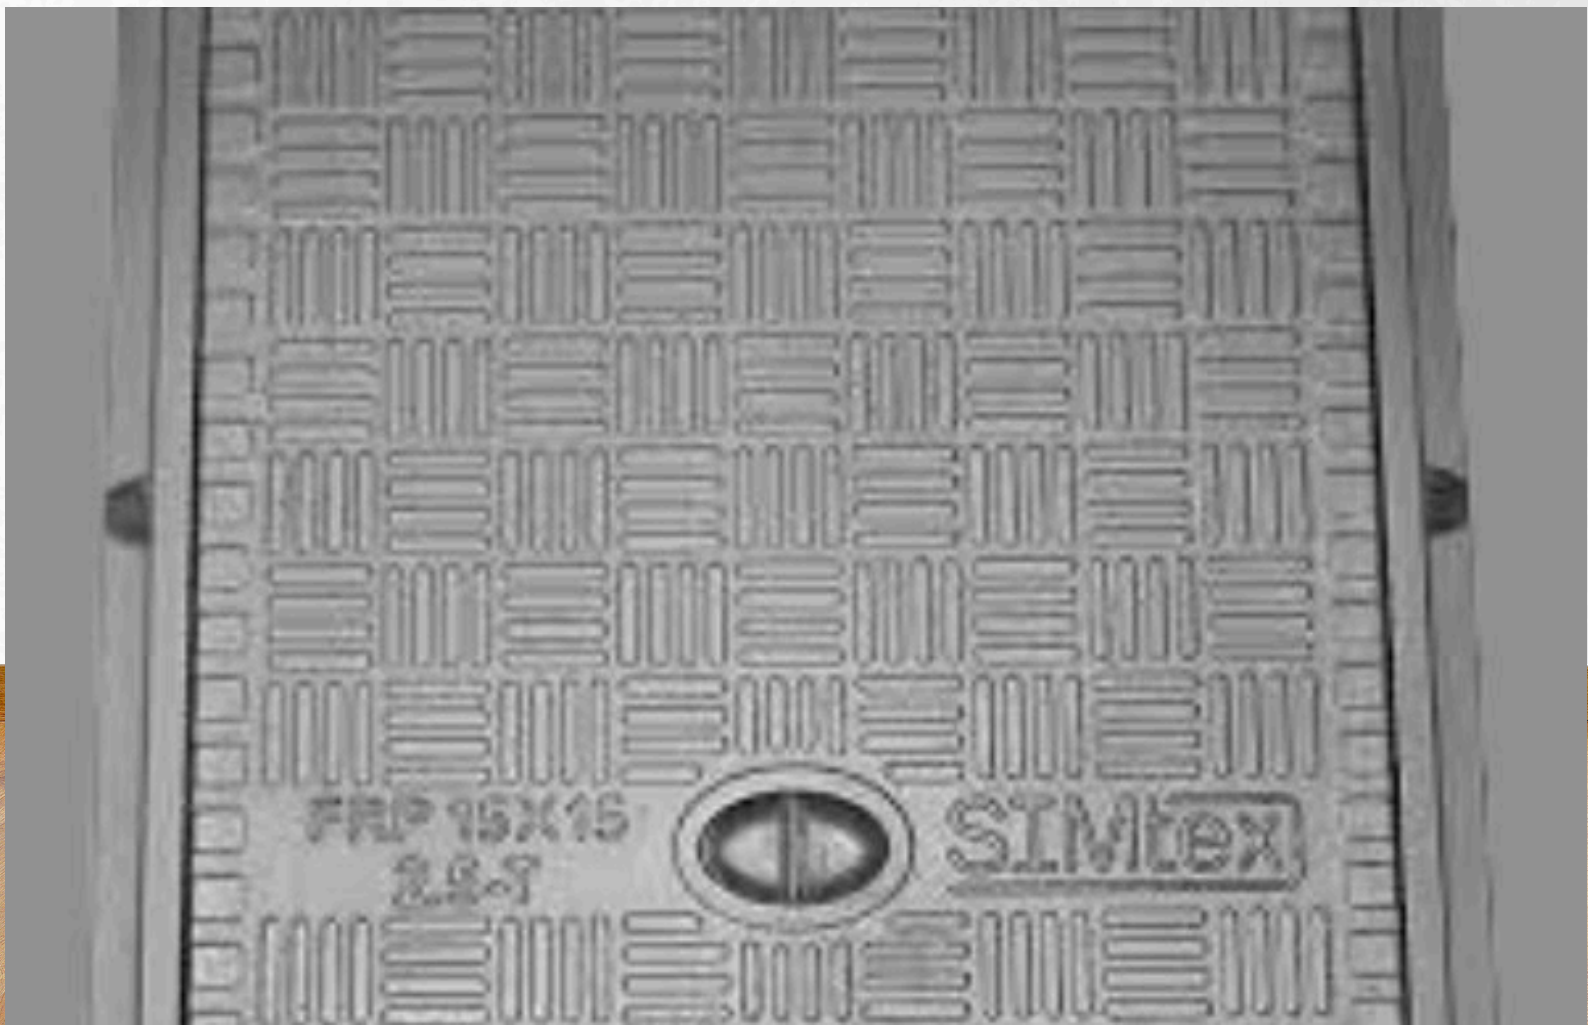

Our Products

FRP Stand

- FRP stands for Fiber-Reinforced Plastic, a composite material known for its strength and durability.
- FRP manhole covers are lighter than traditional concrete or cast iron options, making them easier to install and remove.
- They are also corrosion-resistant, making them ideal for areas with moisture or chemicals.
- Sunbuild Mart might offer FRP manhole covers in various sizes and load capacities to suit your project requirements.
